

NOTICE OF UPCOMING CONSTRUCTION PROJECT

The Borough has recently awarded a construction contract entitled the 2022 Borough of Wenonah Infrastructure Improvement Project to Richard E. Pierson Construction Co., Inc. for the following improvements on the following Borough streets:

STREET	FROM	TO	SCOPE OF WORK
Lenape Trail	Mohawk Dr	Mohawk Dr	Replacement of existing Water Main and Services, replacement of damaged storm piping, and Reconstruction of the roadway, including installation of ADA Ramps and replacement of existing deteriorated driveway aprons, where warranted
Mohawk Drive	Lenape Trail	Woodbury-Glassboro Rd	Milling and pavement overlay of the existing roadway and installation of ADA Ramps
East Poplar Street	Clinton Avenue	Marion Avenue	Reconstruction of the roadway, including installation of ADA Ramps and replacement of existing deteriorated curbs and driveway aprons, where warranted. Also included is select tree removal.
East Poplar Street	Marion Avenue	Princeton Avenue	Milling and pavement overlay of the existing roadway and installation of ADA Ramps
Monroe Avenue	Poplar	Mantua	Milling and pavement overlay of the existing roadway. Also included is the installation of ADA Ramps and replacement of existing deteriorated curbs and driveway aprons, where warranted

- * All residents are advised that the proposed construction will entail disturbance to the Borough's clear zone, which is defined as the area located between the curb and the sidewalk, and where no sidewalk exists, the clear zone is measured as twelve (12) feet perpendicular to the curbline (Ordinance #56-3.B.). Should any private improvements be located within the clear zone, i.e. sprinkler systems and/or landscaping improvements, etc. these items will be removed by the Contractor if found to be in conflict with the proposed construction and the responsibility for their repair and/or replacement shall lie solely upon the property owner and **NOT** the Contractor.

Construction is expected to begin in mid-August and end in late October. Prior to the start of construction, you will receive a notification from the Contractor with additional detailed information regarding hours of operation, contractor contact information, and access to your property during construction. A second round of advance notices will be provided when construction work is anticipated to directly affect your property and require temporary movement of your vehicles to accommodate certain construction activities.

Temporary road closures can be expected and therefore, we ask that you pay close attention to the posted construction signage and be prepared to use alternate routes to avoid conflict with construction activities.

The Contract may also include miscellaneous pavement repairs at various locations throughout the Borough which may present a temporary inconvenience to nearby residents and therefore, we ask that you be mindful of the proposed construction and safety of the construction workers.
